Cornel Adrian Pop

As a beginner in my career, I am motivated to gain experience and develop my IT skills. I want to collaborate with a dynamic team and learn from more experienced colleagues to reach common goals.

C++	●●○○○
C#	●●○○○
SQL	●●●●○
MySQL	●●●●○
Adaptability	●●●●●
Communication	●●●●●
Creativity and innovation	●●●●●

PERSONAL PROJECTS

Book Library (08/2023 - 01/2024)
- In my Java project, I've seamlessly integrated Java's core principles with a variety of design patterns, all tightly connected to a robust database system. UsingJava's powerful object-oriented features and incorporating design patterns, I've crafted a modular and scalable solution.

Languagele (07/2022 - Present)
- https://github.com/CornelPop/Languages
- First mobile app developed by me in **Dart** language. It is a language guessing game and it can be downloaded from the Play Store. There will be updates as soon as possible.

MemoMaster (10/2022 - Present)
- https://github.com/CornelPop/MemoMaster
- The second mobile app developed by me in the **Dart** language. I use **Firebase** to organize each player's data on a server. This app is currently under development and it is a improve intelligence game, by memorizing things like patterns, numbers and words.

Altex Store Deposit Management Project (11/2022 - 01/2023)
- https://github.com/CornelPop/Altex
- The first project made for the faculty, the application was made with the help of **Java**, **Java Swing** and I used elements of **MySQL**, in **MySQL Workbench**. the user can see all the products in the store in a list and apply certain special filters.
